The Nautilus Medical Team has consistently contributed to the advancements in DICOM Imaging Solutions for over the past decade.
Nautilus Medical and Epson America, Inc. are providing meaningful distribution to progressive sites around the world. For over a decade we have helped users gain confidence in receiving, processing, packaging, and redefining how DICOM image distribution is managed.

A user experience like no other.

DicomRay products are designed to provide users a meaningful experience. One that brings intuitiveness, simplicity and complete functionality together on a single screen to achieve the DICOM data access and distribution requirements of your facility.

We are engineering and providing our customers with systems that help solve problems. Using one of the DicomRay products will eliminate your challenges and frustrations found with other systems.

Try any DicomRay system from Nautilus Medical for 30-days risk free. The Nautilus Medical Team stands behind our products and our customers.

Meaningful Distribution® at your fingertips.

DicomRay adheres to the IHE mission to improve the way computer systems in healthcare share information. IHE promotes the coordinated use of established standards such as DICOM and HL7 to address specific clinical needs to support optimal patient care. Systems developed in accordance with IHE communicate with one another better, are easier to implement, and enable care providers to use information more effectively.

Popular Enhancements

MantaRay and FilmRay are two optional features that may be added when needed. These features expand your capability within one single system.

Starting @ $995

MantaRay is a full featured web interface that connects you to any of the DicomRay products via the network. Log in, initiate jobs, query, even check on the status of the system. Perfect for Fuji sites and other locations that need free access.

FilmRay, with its easy USB hook up from any Vidar scanner, provides you the capability to scan film, segment images, and utilize the quality control feature built into the interface of select DicomRay systems.

DicomRay systems include the capability to scan documents, slides, forms, and reports to automatically convert to DICOM and send to PACS. ( Included in Professional versions).

Nautilus invites you to download our official apps from iTunes. Enjoy our iPhone app filled with DICOM history, tag definitions, and bizarre radiology pictures. Our viewer app consists of our award winning dRay viewer to view studies from PACS or modalities for free.
“Working with Nautilus Medical makes my decision process much easier. I appreciate their attention to service as much as their great software.”

Mary
PACS Administrator

“The money we will save over the coming years is going to be remarkable. MatrixRay is the easiest cloud technology to use. It is seamless, secure, and truly valuable for our image transfers.”

Steve
PACS Administrator

Imagine sending a study to any site or destination of your choice with a single click. Imagine that study being transferred securely and quickly at a cost less than burning a CD.

< < < Enter the MatrixRay > > >

MatrixRay is the most efficient and cost effective method of transferring studies from one site to another. Multiple patents have been filed for this secure Peer-to-Peer technology marked as the forefront of the image transfer business. MatrixRay will be sure to change the distribution of images for years to come.

Meaningful DICOM Storage Solutions

PACSray is an icon driven storage system that is highly scalable, reliable, and easy to implement. PACSray may be purchased as software only or preconfigured on servers from 2 Terabytes and up. Whether you need a temporary, long term or a reliable back up solution, PACSray will meet your needs. Features include multiple AE titles, HL7 interface, migration, importing, web viewing, and many other additional features.

Starting @ $4,995

MammoRay is designed to be a turnkey system to facilitate the storage of digital mammography studies, archive priors and store new images. This system is ideal for short term storage and critical redundancy.

Starting @ $4,995

CathRay is a perfect solution for storage of CathLab or special procedures studies. Losing a patient study is never a concern when stored on the CathRay. Stop shelf archiving discs and start archiving on a CathRay storage system.

Starting @ $4,995
Our Customers Are Saying . . .

“It is always a pleasure to work with Nautilus Medical and we will continue to get products through them because they make everything so easy. The software is very user friendly and they go out of their way to ensure everyone is comfortable with the product.”

“We are extremely happy with the application - it works well to merge studies and is very stable.”

“I know that on occasion people ask for recommendations, feel free to point them in my direction. You will get nothing but blazingly positive responses.”

“The staff at Nautilus went above and beyond to accommodate the needs of our hospital. The software interface is very user friendly and easy to use. Our staff required very little training to successfully operate the system.”

“Thanks for your help...new burner is working flawlessly.”

“Nautilus Medical is quite simply the best company I have had the pleasure of working with.”
Discs & Ink

Same Day Labs products are guaranteed to be in stock and shipped the same day as ordered, or shipping is free.

www.SameDayLabs.com
